ESTABLISHED 1888.

C. E. ALLEN'S Special List for Spring OF 1882.

This Rose has been thoroughly tested by the originator in the open ground and under glass, and found to bloom "en-fer" as the ordinary Ten variety, making it one of the finest for conservatory or out-door culture yet introduced. Is a cross between Gen. Jacqueminot and a Noisette (name unknown) raised in New York some years ago. It has proved perfectly happy, growing from 12 to 15 feet in one season; flowering freely in summer and very abundantly in the fall. Its flowers are produced on strong shoots,

from ten to fifteen in a cluster. Color same as Gen. Jacqueminot, whose buds sell in the cities during the winter for from 75 cents to \$1.50 each; flowers larger and more double. The originator says it cannot be too highly recommended to all lovers of Roses. A leading New York florist states that he can attest to all the merits of this Rose. It is this season offered for the first time. Price, strong plants, from 5 inch pots, \$2 each; from 3 inch pots, ready in May, 50 cts. each, no discount.

NEW ROSE, CAROLINE GOODRICH, (Hardy), or Climbing, GEN. JACQUEMINOT.
(For description see first page Descriptive Catalogue.)

This wonderful Pea is the earliest, most prolific dwarf wrinkled Pea in cultivation. Peas planted on my own grounds May 10th were fit for the table June 15th, or in about 35 days. It grows about eight inches high, therefore requires no bushing. The seed of this variety I procured at headquarters last season, and offer it of my own raising, which should produce even earlier results than if grown south of here. The highest authorities in America and Europe give it high praise, and state as to its being the best and earliest wrinkled Pea in cultivation. Packet, 15 cents; one pint, 35 cents; one quart, 70 cents. If sent by mail add postage, 13 cents per pint and 25 cents per quart.

Price per peck, \$4.75; $\frac{1}{2}$ peck, \$2.50.

Andras. Bronze, with a golden margin; very beautiful and large.

Albonia. A first-class flower. Ground color is silvery white, with exceedingly large black-blue center.

Many thousand packages of this improved Pansy were sent out last year, and won universal praise from all who planted them. Their colors range from the purest velvety black to pure white, while the rich and velvety texture is unsurpassed, and it would seem impossible to represent them in artificial colors.

Elegans. This has a bright golden eye and margin; ground color is dark maroon, marbled with bronze.

Jamesy. Lower petals purple, on a yellowish-white ground; upper ones violet, with a blue margin, spotted and marbled with blue; superb.

Bismark. Exceedingly beautiful; marbled with gold, bronze and brown.

Oriole. A very bright, deep golden yellow; first class.

Ultramarine. A delicate shade of light porcelain; has a distinct and large white center; beautiful.

Royal. A remarkably fine variety; color, blackish-purple, rich and velvety.

Splendens. This is quite rare in color, being of a very brilliant claret, red.

NEW PANSIES.

Snow Queen. This new sort is quite different from the ordinary White Pansy. Flowers of a delicate satiny white, with a slight tinge of yellow in the center. It comes quite true from seed. 25 cents per packet.

Lord Beaconsfield. The ground color of the flower is purple-violet, shading off, in the top petals only, to a whitish hue, a peculiarity which imparts to the whole flower an unusually bright appearance. This highly effective and singularly beautiful Pansy cannot fail to speedily become one of the most popular, both for bedding and bouquet-making. Per pkt., 50 cents.

NEW SUNFLOWER.

Oscar Wilde, the famous Newport variety. 25 cents per packet.
